

ID: CAND-007 | LEVEL: Semi-Senior | PROFILE: ML Systems Engineer | YEARS OF EXPERIENCE: 4

PROFESSIONAL SUMMARY:

ML infrastructure engineer focused on training efficiency, data encoding handling, and tools that enable researcher experimentation.

EDUCATION:

B.Sc. in Computer Science.

WORK EXPERIENCE:

- ML Infrastructure Engineer (4 years): built internal tools for researchers, handled data encodings for ML applications, and debugged bottlenecks in processing pipelines.

TECHNICAL SKILLS: Python, PyTorch, data encodings, data pipelines, ML infrastructure, Docker, Kubernetes, parallel computing, profiling/optimization, Git

SOFT SKILLS: impact focus, flexibility, pair programming

CERTIFICATIONS: Google Cloud Professional ML Engineer

LANGUAGES: Spanish (native), English (advanced, C1)

RELEVANT PROJECTS:

- Instrumentation tool to monitor and debug tokenization issues in the training pipeline.
- Data processing optimization that doubled throughput.
